# HEARING CENTER
Eye Consultants of Atlanta

How to disconnect then re-connect your hearing aids from your iPhone at home
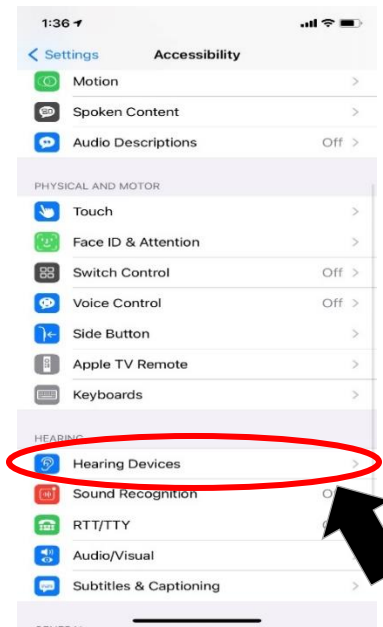

Step 1: Go to Settings App

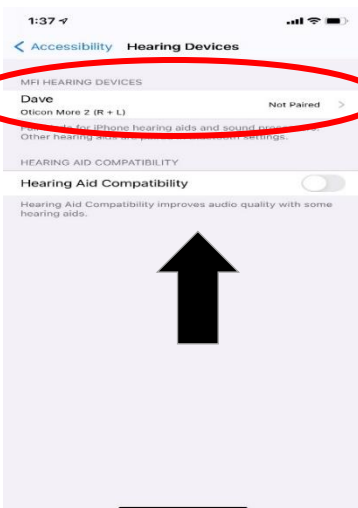

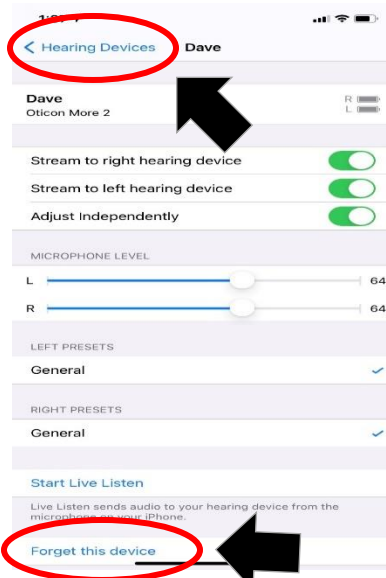

Step 2: Go to Accessibility

Step 3: Go to Hearing Devices

Step 4: Tap on your name

Step 5: Scroll down and hit "Forget this device", scroll back up then hit the "< Hearing devices" in top left to go back a screen

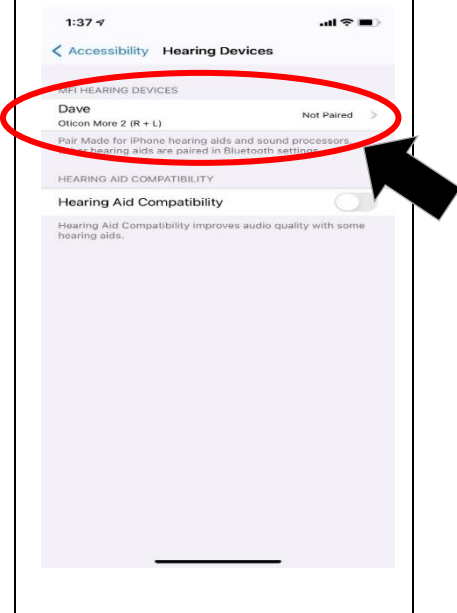

Step 6: Turn off your hearing aids by pressing buttons on BOTH aids SIMULTANEOUSLY for 5 seconds, then turn BOTH back on by pressing BOTH buttons another 5 seconds. If aids are non-rechargeable, open & close battery doors instead of pushing buttons.

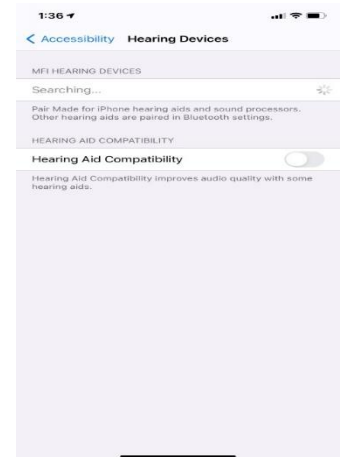

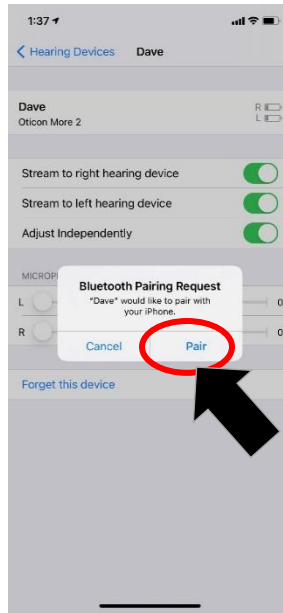

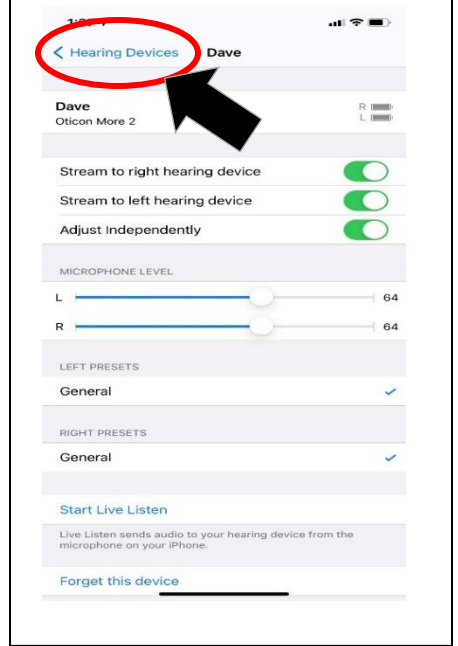

Turn page over

**Step 7**: Your name should appear. Once you see (R+L), then tap on your name.

Step 8: Tap on Pair, once for each hearing aid

Step 9: Push "< hearing devices", now that aids are connected

Step 10: You will see it says both aids are connected

TIP: Turn off play ringtones so that when the phone rings, it rings from your phone and NOT in your hearing aids. This allows you to be able to find your phone and is less likely to frighten you!

TIP: Leave Hearing aid compatibility OFF!
